

AN EXCLUSIVE PROJECT

MAL

AGA

Málaga 2025

Today, Malaga is internationally renowned. A city of culture and technology, and a destination that combines history and state of the art with a Mediterranean and cosmopolitan lifestyle. A place where tradition coexists with innovation, attracting those seeking the extraordinary. A city that keeps on developing, without sacrificing its essence and personality.

Málaga - Este, a synonym for relaxed exclusivity. Its exceptional setting, with views over the Mediterranean and surrounded by nature, is the perfect spot for the ideal lifestyle. A peaceful retreat just minutes from the lively city center, where you can enjoy the privacy and security of the best neighborhoods in the world.

A legacy that transcends time

In the 18th and 19th centuries, Málaga was influenced by visionaries - daring families who knew how to transform the city into an epicenter of prosperity, culture, and sophistication. The proyect draws inspiration from them, paying tribute to their legacy through a residential project that redefines the concept of luxury real estate. Twelve exceptional residences, designed for those who want only to conform to the best.

A vision oriented to excellence

The project reflects the vision of the Spanish real estate development group, alongside a great international team comprising the best professionals in each field. Every detail of the project has been designed with a clear vision for excellence. Its creators, who love Málaga deeply, have devoted years to perfecting every element of the project, ensuring that the architecture and building quality reach the utmost expression.

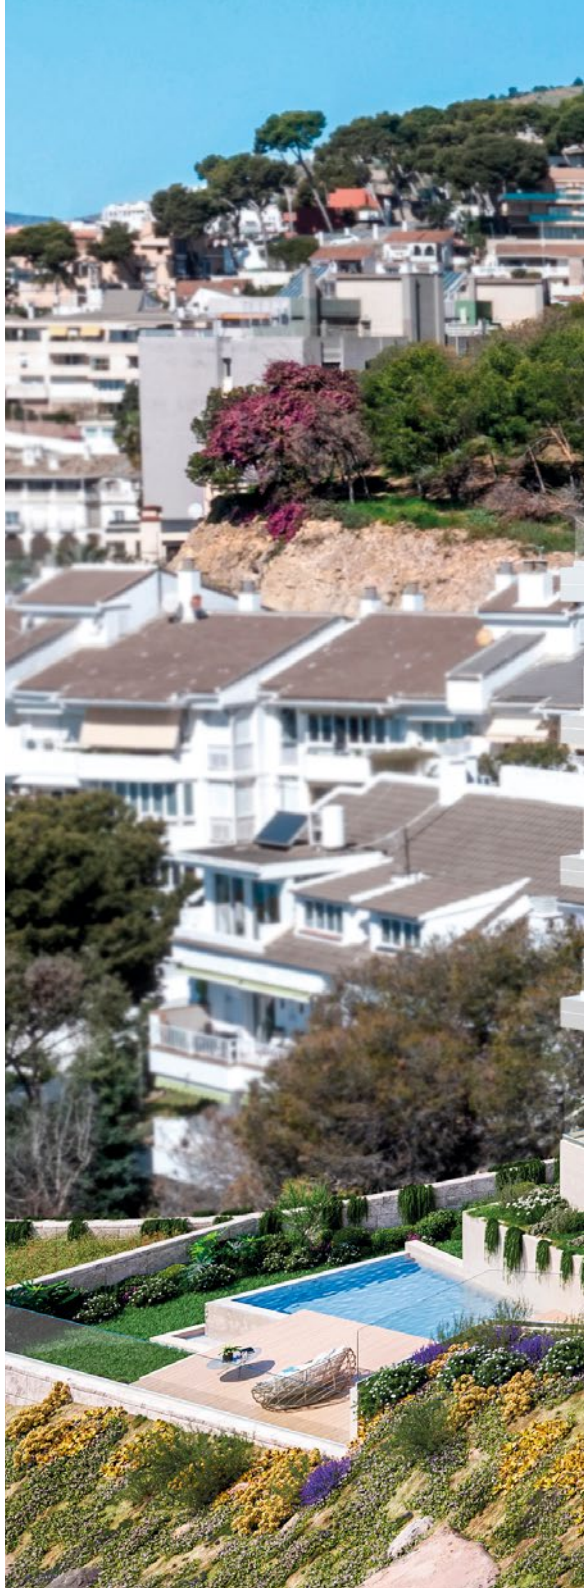

An exceptional setting

In this residential complex, the architecture is inspired by the setting, incorporating it into the lifestyle. The project is located on a hill overlooking the sea and surrounded by pine forests, where the noise can't reach and the sea breeze mingles with the scents of the trees. A dialogue between nature and architecture, where each of the twelve residences is transformed into a living work of art.

Architecture that surpasses luxury

Each architectural solution is the result of an extensive analysis and design process. From the relationship between the views and the rooms to the direction of the sun, each decision responds to the criteria for proportion, function, and spatiality. The architecture is articulated in pure volumes, with fluid transitions between interior and exterior, optimizing lighting, ventilation, and privacy.

Twelve unique residences

Spaces designed for fulfillment and well-being. Each area and each material has been designed with reflection and precision: the strength of the stone, the quality of the wood, and the toughness of the metal are combined with impeccable execution. Generously sized rooms where shape and function work in harmony. The light, volume, and texture create a unique sensory experience, redefining the concept of luxury and transforming it into ULUX, a new standard of unprecedented quality.

Alvar Aalto

Global vision, local sensitivity

The collection of luxury residences has been developed by a top-tier multidisciplinary team, bringing together architecture firms, marketing specialists, and urban planning experts, creating a professional synergy focused on excellence and a respectful dialogue with the environment.
